

# Make This One Change In Your Portfolio Right Now Or Lose Up To XX% Of Your Nest Egg!

The man who told his readers in 2000 to buy gold when it was still a bargain at \$260, before it climbed more than 584% to \$1811...

And who kept his readers safe from the painful losses other investors felt when he forecast a downturn in 2011, within days of when gold corrected its price...

Now tells you how to *protect what you've already got* and **increase it by up to FOUR TIMES your current value!**

Dear Investor,

I'm Larry Edelson, editor of the *Real Wealth Report*.

I'm writing to you to let you know about changes in the gold market. Changes so drastic that you could either set yourself up for life or end up losing everything you've invested.

There are two things you should know how to do when you finish reading this letter:

1. Protect your retirement portfolio
2. Set yourself up for some of the biggest gains the gold market has seen in many years

If you listen to the mainstream talking heads that say gold is the safest place to be, the advice I'm about to give you may seem crazy.

But if you don't follow this advice, you risk losing all the money you've invested in gold and precious metals. Don't let this happen to you! Instead, listen to what I've got to say.

Right now, the global markets are changing. This change will affect the price of gold, silver and other precious metals for the next three years.

The first thing that will happen is the price of these metals will bottom out at historic lows. If you put your money in the wrong place, you can say goodbye to your retirement and hello to a greeter position at Wal-Mart.

If you're invested in the right mining companies, you could grow your wealth by leaps and bounds. No one knows how high precious metals could climb.

Keep reading and I'll tell you the one step you **MUST** take right now to insulate your portfolio from the coming drop. This information alone is worth the time you will spend reading this report. Knowing it may save you thousands of dollars in losses in the near future.

Then I'll tell you about the select group of mining companies I strongly recommend to my readers. Some of these are stocks that posted gains of up to 11,000% in the last phase of the current gold rally. I believe these mining shares could multiply your money **up to four times during the next three years**.

## Timing Is Everything In The Gold Market

The pundits will tell you that they know the gold market inside and out. If you listen to them, you'll miss most of the amazing moneymaking opportunities that are now on the horizon.

Unfortunately, many people missed the signals last time around and lost their shirts because of it. Don't believe me? Let me tell you about Bob.<sup>1</sup>

Bob wrote to me shortly after he joined *Real Wealth Report* in 2012. He told me how he'd missed the signs of the coming gold price decline and that he'd lost more than half his portfolio. Money he was counting on so he and his wife could retire comfortably in about 10 years.

He heard about *RWR* from a friend who told him how I warned my readers in 2011 about this very decline and strongly recommended that they sell their gold bullion. If they refused to do that, they should at the very least hedge their positions with an inverse ETF.

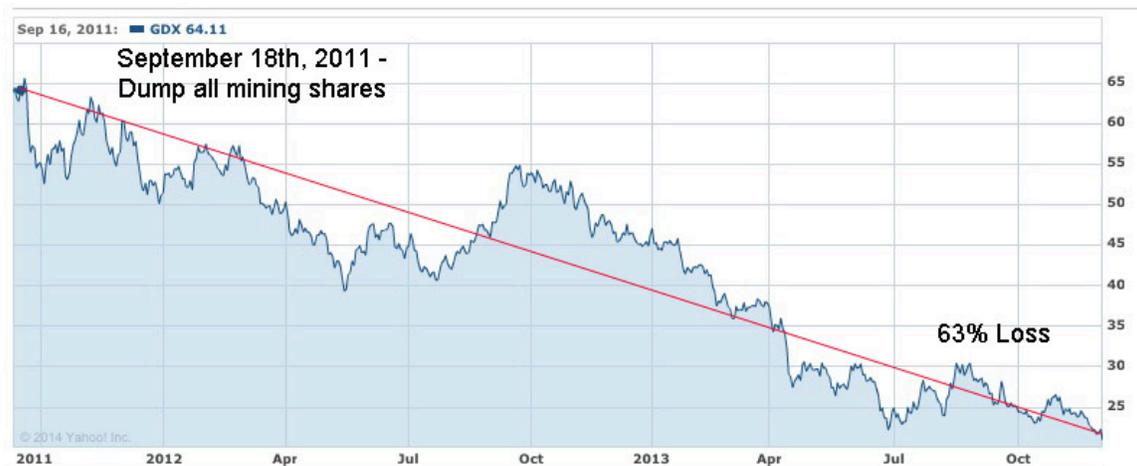

Bob's friend followed my advice and protected his money from this first, drastic fall. Bob lost 38% of his money because he didn't get this advice in time.

Worse yet, I all but begged my *RWR* readers to dump their gold mining stocks a month later. Bob's friend did as I said, and saved everything he had gained up to that point. Bob suffered nearly **double** the losses in the price of bullion, which pretty much shattered his original retirement dreams.

So what happened to the market?

I had been watching the market closely. All of my indicators were pointing to an imminent drop. I gave the sell signal to my readers on September 18<sup>th</sup>, just a few days after gold hit \$1,920 an ounce. Most mining companies also hit record highs around this time. This famous move saved my subscribers thousands of dollars and a lot of stress as they watched the carnage play out before their eyes.

The average mining company lost 63% of its value in the following months. This means shareholders lost \$243 billion.

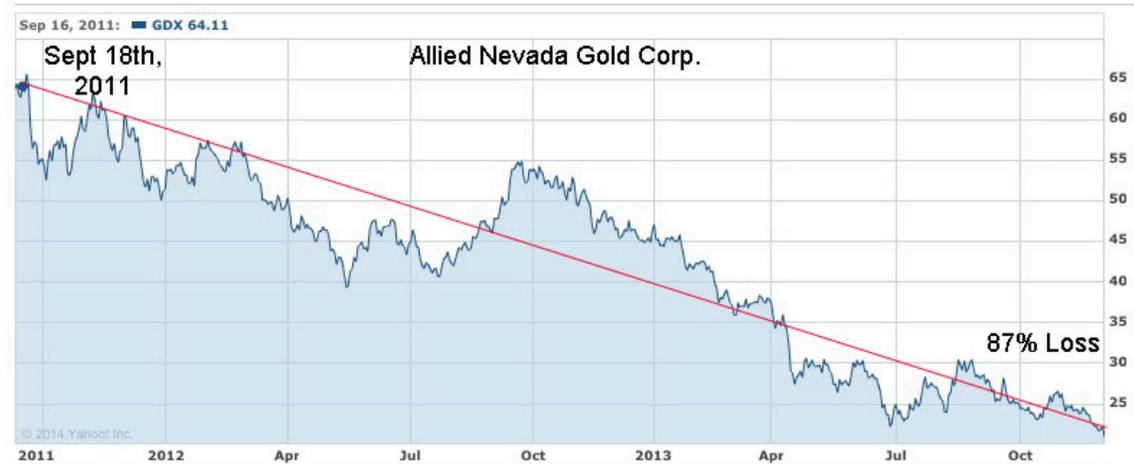

2

### Market Vectors Gold Miners ETF

Small mining companies lost around 78% of their value and some juniors lost even more than that!

- Allied Nevada Gold Corp – Lost up to 87% of its value!
- Patagonia Gold, Mariana Resources and Gryphon Gold Corp were all delisted and are now in danger of bankruptcy!
- Investors in these companies may see a 100% loss!

3

As for Bob, well he's steadily building his portfolio back to where it was by following my advice.

Unfortunately, another drop is coming and if you don't protect yourself now, you could end up in the same boat as Bob.

## Get Ready for Precious Metals to Hit Rock Bottom, then Bounce Back

Why do I believe this is going to happen?

First, let me tell you about what's going on with a bunch of the mining companies out there.

### Senior Miners

A lot of the senior miners took big risks and are making serious mistakes. They're not paying attention to the same signals I see and they've messed up their market timing.

They're starting to hedge their gold again, because they think that gold is in a bear market. When gold and silver suddenly shoot upward, they're going to be in a really rough spot.

By selling their gold and silver at lower prices, they're not going to get back the share valuations they got previously and they'll lose out.

Add to this the fact that many senior miners bought up properties and tiny resource miners when gold was at \$1,800 and \$1,900. And they did this by borrowing huge sums of capital. Now that interest rates are rising, those debts are going to destroy their earnings and valuations.

These guys are setting themselves up to miss out on the next big boom in the precious metals market.

### Junior Miners

The majority of this sector is doing even worse.

Many junior miners took on too much debt at the top of the market. Now they can't afford to mine the properties they borrowed so much to buy. They're struggling to pay off those debts as interest rates continue to rise. They're facing some pretty lousy choices. Some of them are raising capital by selling secondary shares. Of course, this move seriously devalues current shares, which is terrible for shareholders.

On top of this, many of these companies don't have senior managers who have a clear vision of how handle a precious metals bull market. They put all their eggs in one basket and hope and pray nothing breaks when the basket drops.

This means they lose **your money** when catastrophe strikes.

These junior miners bought properties in politically unstable countries and remote areas of the globe.

If these companies find viable properties and want to start digging, they risk having new governments milk them for taxes and royalties or nationalizing their properties.

Your money is at risk because of these factors. So this is the **one thing** I mentioned earlier that I want you to do to **protect your portfolio right now**.

My research shows that these 10 mining companies are going to implode and take their investors down with them.

If you own shares or warrants in any of these companies, do yourself a huge favor and dump them right away.

All of these companies are making serious mistakes, like:

- Carrying way too much debt
- Their total production costs are far too high

#### Get OUT of these 10 Companies

Barrick Gold .....	ABX
AngloGold Ashanti .....	AU
Newcrest Mining .....	NCMGF
Endeavor Silver on the TSE .....	EDR
Great Panther Silver .....	GPL
Paramount Gold .....	PZG
Rubicon Minerals .....	RBV
Richmont Mines .....	RIC
Nevsun Resources .....	NSU

- They're starting to re hedge their gold and silver reserves and resources at prices that are too low

Some of them are guilty of all three mistakes.

Get yourself out now while you still have the chance!

So what do you do with all that money you've just rescued from a potentially huge loss?

## Let Me Tell You Why I Firmly Believe There's a Bright Future in Gold

Here are the 5 reasons I am convinced the price of gold is just going to keep going up in the next three years.

1. **War Cycles**<sup>4</sup> – From now until 2020, things will continue to heat up. Iraq, Syria and Ukraine are just the beginning. Civil unrest will continue here at home. Our government will continue to look for new ways to tax and confiscate our wealth. There are more international conflicts on the horizon. New terrorist groups will pop up. In the next 6 years, investors will buy and hoard hard, tangible assets.
2. **The Dollar Declines** – The U.S. dollar will lose its reserve status by 2016. China is likely to emerge as the world's largest economy.<sup>5</sup> Our current monetary system will burn like a Phoenix and a new one will rise from the ashes. All of this will make commodities very appealing for investors.
3. **Inflation** – Regardless of what the pundits say, when inflation rises, gold tends to go right along with it. In fact, during the recent rally of the U.S. dollar, gold rose from \$1,178 to \$1,300.
4. **Less gold to go around** – The bear market of the past three years has been hard on miners and producers. Many of them have shut down their operations. The big commodity firms that are still around don't have the capacity to increase production.
5. **Demand from Asia** – Asia will increase its demand for gold in the next few years.

I have two categories of top-notch miners I strongly recommend you invest in to diversify your portfolio.

### Category 1: Tried and true performers

These companies are part of a carefully selected group. I include some strong and steady junior miners with low production costs, good properties

and competent management. I also added some senior miners who avoided getting mired down in the problems I talked about earlier. I believe these seniors will perform well in the coming months and years. Readers of *Real Wealth Report* get access to the full list.

These companies should go into your core portfolio:

- ✓ **Junior miner No. 1** – This company has nearly 19 million ounces of proven gold and 40 million ounces of resources. That gives them an asset base of \$XX billion at today's gold prices. Buying shares in this company is equivalent to buying gold at \$XXX an ounce, which is a discount of XX% **I expect this company to gain 393% in the next 3 years.**
- ✓ **Junior miner 2** – If you buy shares in this company, you're getting interest in its gold reserves, 89 million ounces of gold, worth \$113 billion, at \$XX an ounce. That's a XX% discount from today's gold price. **I expect this company to gain 294% in the next 3 years.**

## Category 2: High-octane performers

These companies are more speculative but they still have solid business models. The junior miners have high betas, which will send their share prices higher, at a much faster rate than their competition.

- **High-octane performer 1** – These folks produce silver at about **\$11 an ounce**. That's just over half of what you'd pay for silver bullion today, including all costs.
- **High-octane performer 2** – Buying shares in this company is like buying gold at \$XX an ounce. These folks are sitting on upwards of 19 million ounces of gold at a total ownership and production cost of a mere **\$262 an ounce**.
- **High-octane performer 3** – These folks have as much as 53 million ounces of gold. And they're smart enough to let others do the hard work, while they collect a steady stream of overriding royalties.

As I mentioned earlier, in the gold and precious metals markets timing is everything.

And unfortunately, if you miss the timing, you lose everything. So how do you hit the timing just right?

By Subscribing to *Real Wealth Report*

Don't listen to what the so-called experts tell you. You can't just rush in and buy shares in failing mining companies and expect to see incredible gains. You must know which companies will continue to fail and which will succeed for many years to come.

That's why I write the *Real Wealth Report*. I started this newsletter in 2004 with one main objective:

**To help you protect your precious nest egg and get rich by investing in the right natural resource stocks.**

With this information, you'll see profits soar. You'll watch your retirement portfolio grow so large, that you won't need to worry about what happens when the markets turn.

You can't invest in gold, silver and other precious metals by yourself. That's why I'm inviting you to subscribe to *Real Wealth Report*. Sign up now, so you can take advantage of the coming 3-year bull market.

**Grab the opportunity to multiply your money several times over between now and 2016!**

But you must act fast. These changes are coming any day now. You want to stay ahead of the game so you don't lose everything you've already got. You need to know when to jump on the right opportunities as they come up.

Every month, I'll send you detailed economic analysis, and expert guidance on where to put your money. All of my recommendations can potentially increase your bottom line. They'll also protect your current investments from the ravages of changes in the market.

You see, as an *RWR* member you'll learn about much more than gold. I also recommend **silver, platinum and palladium**. These metals tend to rise along with gold and are a great way to insulate your portfolio.

In fact, you'll get so much more than just gold and precious metal advice. In the *Basic Survival Strategies*

## What You Missed By Not Subscribing to *RWR*

- Gold ETFs

section<sup>6</sup>, you'll find a variety of investment recommendations to protect your wealth, such as:

- Treasury Inflation-Protected Securities (TIPS)
- Foreign currency CDs
- Currency ETFs

These aren't speculative recommendations. They're alternative ways to protect your cash reserves from being devalued by the weakening dollar.

The *Real Income* section offers great recommendations on all kinds of top-quality income investments, including:

- High-yielding resource stocks
- Higher-paying foreign bonds
- Dividend-paying corporate bonds in undervalued companies
- Special income situations now cropping up in the market

In the *Materials, Energy & Agriculture* section, you'll learn about investing in natural resource companies all over the world. These companies produce materials for the construction and technology industries.

You'll also learn about several excellent opportunities in the energy sector. I'll tell you about everything from oil and gas to solar, wind and biofuels.

And we'll top this section off with recommendations in the agriculture sector. If you've watched the news over the last few years, you've heard about the rising price of food.

More expensive gas and transportation costs, as well as drought will keep food prices going up. I anticipate prices to go up 300% on some food items. The decline of the dollar and the world's growing population of 7 billion people will all contribute to this.

For you, this means it's time to make prudent investments in agriculture. These investments let you

## What Readers Say About *RWR*

***“Confidence in your honest predictions has helped to allay any worry about losing my retirement funds. I am 50% better off because of trusting Larry.” – Rev. James B. of Powhatan, VA***

***“I began subscribing to Real Wealth Report before gold was at \$300 an ounce, so you know my portfolio is up several hundred percent.” – Randy O. of Irving, TX***

***“I’ve only been a subscriber for a couple of months. So far I’m very impressed. These moves saved me approximately \$50,000 in the last two months.” – Mike C. of Inverness, IL***

protect yourself and your family against these rising costs by increasing your income. They also let you take advantage of the potentially large capital gains the agriculture sector has to offer.

The *Asia* section covers the rise of China and the growing wealth in other Asian countries. Don't ignore investment opportunities in Asia if you want to get rich.

The final section is *The Speculator*. Here, you'll find recommendations that don't fit into the other categories. I firmly believe these are all worthwhile investments.

I write every issue of *RWR* to help you increase your wealth so you can live a happier, healthier, more enjoyable life.

When you read *RWR*, you won't have to worry about what happens in the market.

Instead, you'll watch your portfolio grow and grow. You can make plans without worrying about having enough money to pay for that European vacation your wife has always dreamed about.

Based on information I've given readers in the past, they've been able to turn **\$40,000 into more than \$1.2 million.**

I make recommendations like this every month. In fact, as I mentioned earlier, I am looking at three new stocks that have posted gains of 1,577%, 3742% and 11,186% respectively. If you join now, you can potentially turn a **mere \$10,000 into \$167,700, \$384,200 or even up to \$1.1 million!**

So don't be like Bob, the reader I mentioned at the beginning of this letter. Subscribe to *Real Wealth Report* now so you **don't miss out on the incredible opportunities** I see coming in the next 3 years. Take advantage of the special offer I've set up to give you the best price on *RWR*.

Along with all of the latest investment information, you also get lots of other benefits.

You see, I do so much more for my members than just jot down some important investment advice every month. I search the globe looking for the best investment ideas.

I frequently travel overseas to investigate events on the ground. This way I know exactly what's happening and how it affects your bottom line. I also

visit many of the companies and recommendations I make so you have first-hand knowledge as to whether they're likely to succeed.

All of my recommendations regularly make profits and produce real products. I want all of your investments to be in real, tangible things that people, industries and governments must have to survive.

As a member of *RWR*'s exclusive club, you'll get many privileges, such as:

- ❖ **Constant tracking of market movements** – Every day, my staff and I analyze world events, geopolitical developments and a range of other factors to bring you up-to-the-minute intelligence that is crucial to the performance of your portfolio. ## All The Information You Need To Invest In Natural Resources.

I designed these reports to make sure you know the nuts and bolts of natural resource and precious metal investing. That way, you know exactly what actions to take when you open your first issue of *Real Wealth Report*.

It doesn't matter if you've never invested before or you're a long time investor with years of experience investing in gold and silver. You'll learn plenty from these two reports.

### **Free Report #1. Natural Resource Investing 101**

This is a primer on everything you need to know about investing in natural resources. It covers the different types of recommendations I make every month. It explains how each of these investments can affect the growth of your portfolio.

You'll learn why each of these investment types is useful and how to maximize profits from each of them. You'll also learn when to put each of these investments into play and what each investment type can potentially do to grow your nest egg.

### **Free Report #2. The Great Gold Bonanza of 2013 – 2016**

In this report, you'll learn how to avoid getting ripped off while still taking advantage of everything gold has to offer. Read this report cover-to-cover before you buy a sliver of gold bullion. This report is designed to protect you from the disreputable gold dealers out there.

This comprehensive guide will teach you:

- **Where insiders place their bets**
- **How to avoid the biggest rip-offs when buying gold bullion**
- **The best way to protect your privacy when buying gold**
- **My top-secret, exclusive list of recommended gold dealers**

Normally, these reports retail for \$79 a piece. Right now, you can get them **free** with a 1-year subscription to *Real Wealth Report*.

You'll need the information in these two special reports to **grow your portfolio by leaps and bounds.**

And right now, a 1-year subscription to *Real Wealth Report* **will only cost you \$49.00.**

Normally, I charge \$198 per year, because the information in *RWR* is so valuable. It takes a lot of time for my staff and I to collect and analyze all of this research.

Right now, I see the coming changes in the market and how much people like you could benefit from the coming upswing. I want to expand my readership and make you part of this exclusive group of savvy investors.

So I talked it over with Martin Weiss (my publisher and owner of *Weiss Research*). He agreed to lower the subscription price and let you have all of this valuable information for **\$307 off the regular price.**

You'll get 12 issues of *Real Wealth Report*, plus a year's worth of flash alerts, special reports and four invite-only, special online briefings where you can ask me questions, for \$49.

And on top of all of that, you get a free subscription to *Money and Markets* our daily newsletter, and the two free reports; **Natural Resource Investing 101** and **The Great Gold Bonanza of 2013 – 2016. That's an 86% total savings!**

What's more, Martin has agreed to let me offer you 2 years of *Real Wealth Report* for just \$89. **That's more than 78% just off the regular subscription price.**

Martin has also generously allowed me to include **3 more free reports, each valued at \$79**, when you join us for 2 years. **That's \$395 worth of valuable information – for free. Total savings for two years of *RWR* and 5 reports - \$702**

These additional 3 reports are worth far more than their cover price of \$79. The information in each of these reports will give you the best starting points for investing right now and in the future.

### **Free Report #3. My Top Seven Gold Stocks**

I want to tell you about the right companies to invest in, so you can avoid catastrophe when gold market hits bottom.

These seven top gold stocks will give you the best opportunity to increase your money over the next several months and years.

What's more, this report includes all the reasons I firmly believe gold prices are going to skyrocket in the next few years.

#### **Free Report #4. The Great Materials Explosion of 2013 – 2016**

You can't help but feel bullish about the materials sector when you consider the huge building boom in Asia. They're constantly adding housing, commercial properties and public transit.

In fact, I see this trend continuing upward for many years to come because of:

- An increase in the need to replace and repair infrastructure in much of the developed world.
- A desire to continue building and improving in the developing world.
- The slow plummet in the value of the U.S. dollar driving the prices of most natural resources consistently upward.

You need to add these companies to your portfolio to give it a supercharge.

#### **Free Report #5. Beyond Gold: The World's Best Inflation/Crisis Hedges**

You need to know what is going to continue to happen to this bull market in the upcoming months and years.

I am convinced that this bull market will continue for many years. I want you to be able to take advantage of every twist and turn it may take.

When I look at the many indicators, in the news and elsewhere, I fully expect many more years of:

- Fierce battles over oil that will continue to drive its price to record highs.
- Intense competition for uranium, copper, steel and gold between China and India.
- The systematic devaluation of the U.S. dollar, as the government tries to "deflate away" its growing debts.

This report will give you everything you need to know, so you can convert global problems into huge potential gains.

## 2 Opportunities To Join *Real Wealth Report* – 3 Ways to Sign Up

By now, I hope you see the amazing deals I'm offering you.

Just to say it again:

You can get a 2 year subscription to *Real Wealth Report*, plus all 5 of the free reports, **for a mere \$89**. This gives you everything you'll need to have a long and wealthy career of investing in gold, silver and natural resources.

That's a lot less than you would spend on coffee every month at Starbucks.

If you think \$89 is too much, look at my original offer.

That's the 1-year subscription to *Real Wealth Report* plus the first 2 free reports for **\$49**. This will get you started so you can grow your portfolio.

**YES, LARRY! I want to protect my assets and GROW my wealth FOUR-FOLD as the U.S. economy and dollar grow weaker. Please accept my new membership in your *Real Wealth Report* newsletter service as indicated below.**

I understand that I must be delighted with the profits I earn, or I'm entitled to a refund under the terms of your membership guarantee. And, when I pay by credit card, I'll benefit from your automatic renewal plan. Each time my membership is about to renew, you will notify me ahead of time.

Plus, I'll lock in this low discounted price forever — I'll never pay a penny more as long as I remain an active subscriber. That will save me as much as 78% every year.

**BEST VALUE: Two years, \$702 in total SAVINGS!**

I pay just \$89 and receive FIVE Bonus Reports - *Natural Resource Investing 101*, *The Great Gold Bonanza of 2013-2016*,

*My Top Seven Gold Stocks*, *The Great Materials Explosion of 2013-2016*, *Beyond Gold: The World's Best Inflation/Crisis Hedges*, a \$395 value, FREE!

**GREAT VALUE — One year, \$307 in SAVINGS.** I pay just \$49 and receive *Natural Resource Investing 101* and *The Great Gold Bonanza of 2013-2016* — a \$158 value, FREE!
